It is almost the equivalent of the "ceteris paribus" that every student of economics remembers: the simplistic assumption that the rest of the issues remain the same. The future "business as usual" of the IMF's latest global report is based on six scenarios that most users of this information ignore, being immersed in a report of hundreds of pages. The six main ones are: 1) Moderate fiscal consolidation continues in advanced economies. 2) Unchanged tax policy in emerging markets. 3) Slow normalization of US monetary policy, with rising longterm interest rates. 4) Gradual but soft increase in oil prices. 5) Continuity of some of the current geopolitical tensions, especially And the Middle East, but with the tendency to be reduced 6) no consideration of durable growth reductions in China or other emerging economies. The future scenario designed on these assumptions is plausible, but in times of movement, like those present, it is inevitable to consider the effects more from the continuityist. This mentioned some changes to be considered: GREXIT, the Community's policy is more prone to growth, Á The latest recovery of the prices of small, new geopolitical tensions, sudden fall in China, difficulty in one of the other "frágile" economies, áĉ " is convenient to think of different scenes and their consequences.
