Since 10/13/2019, 8 Portals can be bought with 250 ROBUX. Upon an unanchored block or player touching it, the block/player will be teleported to another Portal of matching color. If all four Portals are the same color, all of them will go to the fourth Portal and the fourth Portal will teleport to the third Portal. 4 Portals are obtainable through touching the Medium Treasure #4. 12 Portals also used to be obtainable by touching the Medium Treasure #7, the Medium Treasure #12 and the Medium Treasure #20 (Each chest gave 4 Portals). Trivia It can be used for futuristic looking builds. Portals are often used by players to bypass Locked Doors by placing a Portal inside another player's boat. Portals are rather strong Blocks as they have 10 hit points, making them stronger than any material block. It is a key for numerous AFK Gold grinders. The player can collect 4 more Portals if the player redeems a code that comes with the Chilthril1709 toy, along with a Chillz' Plushie and the Steampunk Jetpack. The player used to be able to get 8 more Portals when they redeem the codes "The Sasquatch?", "Lurking Code", and "500M Visits" (Expired). That means each player can get 20 Portals at most without using duplication glitches or ROBUX. The Portal can be used to travel far distances, but it can take a long time to set it up. The Portal can be painted in two different ways. Clicking it once will only paint the circles on the four corners, clicking it another time will paint the entire portal. This no longer works. However, only the first paint will be saved into a Saving Slot. The Portal has the same hit points as Mystery Block. The Portal conserves speed. For example, if a player travels into a Portal at high speed, they will come out at the same speed. Sometimes, Portals will prevent a player's Pilot Seat from turning when they want it to temporarily. Portals can connect with another player's Portals if they are on the same team. Occasionally, Portals of the same color will connect like chain links. Portals are sometimes used to trap players, as a player can create a "jail" using 4 Portals , two painted one color and the other two another color. The player will not be able to escape, unless they reset. When the Mystery Block turns the Portal into gold, it will appear chrome on the exterior and black with a yellowish-gold center. When it has been painted and altered by the block, it will change the center to the color of whatever color it has been painted. (e.g. the red Portal below has a red middle circle) This also happens on the quest , Thin Ice. Once affected by the fan, the Portal will have the same visual effect as the gold effect, except it has 1 strength and has a blue-colored outside. Due to a bug Portals do not work on the Thin Ice quest. Customizing your player avatar in ROBLOX is usually limited to paying for gear in the form of the game's premium currency - Robux.
